KNOW YOUR HISTORY

Our EzTrends software allows you to display and log all engine performance data, FREE with JPI EDM instruments.

EDM 930
The EDM930 is certified as a primary flight instrument. With the 930 on board, you can remove most of your old engine gauges, and open up valuable panel space.

EDM 960 TWIN
The EDM960 is certified as a primary flight instrument. The 960 can open up space in your panel, allow precise engine management, and log performance history.

EDM 900
The EDM900 is certified as a primary flight instrument, featuring all engine readouts in a user configurable format. The EDM900 can be placed vertically or horizontally.

EDM 830
The EDM830 with fuel flow and a full GPS interface is offset to allow a vertical or horizontal fit in any panel. Homebuilders can also use the EDM740 version of this EDM.

After your flight, your EDM can be downloaded into our free EzTrends software program. By reviewing your engine's flight data history you can spot performance trends before they become problems, increasing flight safety.

Technology That Works.
